FFS Rolls are developed for different FFS (form-fill-seal) machines.

In this Roll we can combine high strength with good hot tack and right friction.

Typically FFS Rolls are used in the production of granular and powdery products which use gravity for bag filling.

FFS rolls are available with upto 4 color print, with side folds and embossed, to prevent filled palletized PE bags from slipping during storage and transport.

Special applications for FFS are for example:

1. Food industry - For salt, sugar, pasta packaging.
2. Construction industry - For chalk, plaster.
3. Agriculture - For soil packaging
4. Petrochemicals - Packing of granulate material like Polyethylene granules, master batches etc.
